Jamie Cahn

Senior Product Manager

Highlands Ranch, CO (Remote, US) · jamie.cahn@pm.me · linkedin.com/in/jcahn

SUMMARY

I am a product leader and technical founder with 10+ years across product, operations, and engineering. I own the roadmap, backlog, and PRDs for Huntscape, a live iOS/Android platform with a web portal and partner app. I previously led R&D engineering on HoloLens 2 AR software for brain surgery. As Operations Manager I helped grow an HVAC contractor from $2.5M to $7.5M in annual revenue.

CORE SKILLS

- **Product:** roadmap, backlog, requirements, PRDs, field tests, offline-first mode
- **Tools:** Claude Code, Git, Expo, Next.js, Supabase, PostgreSQL
- **AI-native PM:** AI coding agents, specs in the repo, Claude Code
- **Technical:** iOS/Android, OpenCV, HoloLens 2, PostgreSQL
- **Privacy, security, compliance:** role-based access, region-scoped data access, server-enforced visibility, EXIF/GPS stripping
- **Business:** client negotiations, workflow redesign, HR, marketing, IT, and operations

EXPERIENCE

Founder & Head of Product, Huntscape — Remote, CO · 01/2018 – Present

- Own the roadmap, backlog, and requirements; shipped to TestFlight and Google Play internal testing.
- Keep PRDs live in each Git repo so engineers and AI coding agents share one context. When scope changes mid-build, the spec changes first.
- Designed role-based access for 14 roles with a page-permission matrix and region-scoped data access.
- Wrote privacy and safety rules into requirements for a product open to minors: server-enforced visibility, no under-13 accounts, no stored precise location, EXIF/GPS stripping on uploads.
- Ran live multi-user field tests, including on-site at BlizzCon 2026, then rewrote requirements around what failed, including an offline-first mode.

Operations Manager, PS Cool Heat — Highlands Ranch, CO · 01/2024 – 02/2025

- Helped grow annual revenue from $2.5M to $7.5M and earn Lennox Premier Dealer status.
- Lifted customer engagement 76%, grew the social audience 150%, reached a 92% email open rate, and cut targeted costs 50%.
- Ran HR, marketing, IT, and operations.
- Planned and ran the company's first trade show, reaching an estimated 7,500–10,000 attendees.

Marketing Manager & Web Developer, D3 NYC — Remote · 01/2020 – 10/2025

- Promoted twice, from Email Developer to Web Developer to Marketing Manager, and kept owning web development alongside the marketing role.
- Led the marketing team across most client accounts, including Lufthansa, DirecTV, Citibank, and FanDuel.
- Ran client negotiations and kept 10+ concurrent web development engagements on schedule.
- Lifted team task efficiency 25% in the first quarter through workflow redesign.

Senior Software Engineer & Team Lead, Hoth Intelligence — Remote · 09/2021 – 03/2022

- Led the R&D engineering team (grew from 3 to 5) while the company scaled from 3 to 10.
- Handed off a clean, stable codebase for the FDA approval phase.
- Advised the CEO and COO on day-to-day operations and helped screen hires.
- Built companion AR on iOS, including face and body tracking with OpenCV.

EDUCATION & CERTIFICATIONS

- Computer Science, Mathematics & Spanish coursework, Southern Illinois University Carbondale
- Computer Science (Mobile Development) coursework, Full Sail University
- PSM I · XR-Terra AR/VR Developer
